I submit herewith a Final Note by the FIRST

Member of Council on the subject of the scheme for the drawing of copper wire required for transformer winding and for the Nakki industry, in the Government Electric Factory,

.....

for His Highness' gracious approval.

Mirza M. Ismail

Dewan.

Mysore,
23rd October 1939.

Final Note by the First Member of Council.

Subject.—

Proposals for the drawing of copper wire in the Government Electric Factory.

3 The Government Director of Industrial Concerns has submitted a scheme for the drawing of copper wire required for transformer winding and for the Nakki industry. As the equipment required for drawing wire for transformer winding involves a heavy outlay, he recommends that for the present, the scheme may be limited to the drawing of wire for the Nakki industry which is in urgent need of some assistance. He proposes, in consultation with Mr. Henry Richard, Engineer, Bangalore, and the Secretary to Government, Electrical Department, to manufacture locally a small and inexpensive plant for the purpose in the Government Electric Factory. The minimum equipment required for the drawing of bare wire -90 tons during a year of 300 days, is estimated to cost roughly Rs.4,750.

4 The Government Director further proposes the employment of Mr. Richard in the Government Electric Factory for the purpose of manufacturing, erecting and running the machinery on a salary of Rs.350 per mensem during the period of construction and the erection of the machinery (about 8 weeks) and Rs.450 per mensem during the period of production. He also proposes to purchase about 100 tons of copper or copper wire required in this connection at about Rs. 1,200 a ton from Bombay.

5 It is understood that the scheme promises to be profitable and would save the local Nakki industry from serious dislocation. It is therefore proposed to sanction the above proposals of the Government Director. The Dewan and the Second Member of Council are also agreeable thereto. I submit the above proposals of the Government Director for the gracious approval of His Highness.

Camp Mysore,
22nd October 1939.

GOVT. DIRECTOR U.O. 659 Dated 5-12-39 INDUSTRIAL CONCERNS

I enclose herewith the note of the General Manager, Government Electric Factory, regarding Copper Wire Drawing Scheme sanctioned in G.O.No. D.2311-12/I&C.269-39-2 dated 4-11-1939. The capital expenditure required is Rs.4,750/- and a sum working capital of Rs.1,34,000/- is required as working capital, of which the cost of copper wire itself comes to Rs.1,25,000/-. The details now submitted are as required in para 2 of the above Government Order.

I request that sanction may kindly be accorded for providing the fixed and working capital expenditure of Rs.1,39,750/- during the current year.

Ref: G.O. No.D.2311-12/I&C.269-39-2
of 2/4th.November '39.

I submit below the details of amount required for expenditure in connection with the above scheme during the current year.

Cost of copper wire,100 Tons @ Rs.1,200/- per ton -		Rs 1,20,000.
Railway freight and other charges on the above at Rs50/- per ton. -		5,000.
Salary of the expert for 9 months from 1-11-39 -		
For 3 months @ Rs.350/-		350.
" 6 " @ Rs.450/-		2700.
		3,050.
Labour and other consumable stores @ Rs.500/- per month for 9 months. -		4,500.
For unforeseen items.		1,450.
	Rs	1,34,000.
For Capital expenditure. -	Rs	4,750/-

I request you to kindly obtain sanction of Government for additional working and Fixed Capital for the scheme required during the current year.

The G.O. is returned herewith

K. Kattaswamy
General Manager,
Government Electric Factory.

HSK.

7339

W.7649.35 Govt. Electric Factory. Dated 23.6.1939.

Re. Wire Drawing Plant.

Mr.Henry Richard, Engineer, Bangalore who has had considerable experience of gold thread weaving and Nakki work in Bangalore approached me a couple of months ago with a scheme for the rolling of smaller sections of copper wires suitable for Nakki work in India. Incidentally the smaller sections of copper wires required for the Transformer Section of the Government Electric Factory could be rolled on the equipment provided in the estimate. It may be that with the same equipment, we can supply some of the demands of the Government Electrical Department. There is also a demand for Nakki wire from outside Bangalore.

Mr.Richard has studied the question in detail and obtained quotations from manufacturers. He has revised the estimates and the scheme after discussion with me.

The Scheme has also been studied by Messrs.Krishnamurthi and Rama Rao of the Government Electric Factory at my instance and we have come to the conclusion that the scheme is prima facie promising and worth taking up as part of the activities of the Government Electric Factory as the following rough figures indicate.

Capital Cost. Rs.1,00,000. Making allowance for excesses and further increase in equipment that may be considered necessary.

Operation expenses above material	Daily Labour	Rs. 15/-	a day.
	Power & Light	" 12/-	"
	Depreciation at 10%	30/-	"
	Stores & supplies.	5/-	"
	Overhead & Supervision.	15/-	"
		Rs.77/-	a day (working year of 300 days).

On larger sections there is a customs duty of 10% Advalorem and on smaller sections 30% Advalorem (extract of Indian Customs Tariff 73 (6) and 73 (1)). Even assuming that the C.I.F. price is the same for all the sections, there is a difference of margin of Rs.150/-.

Taking 55 £ per ton	at 10% duty.	55£.
	at 30% duty	16.5 Savings 11£ or Rs.150/-

On the basis that we roll no more than 100 tons to meet the Bangalore Nakki demand and 100 tons for the Transformer Section, the cost including depreciation works out to Rs.115/- a ton distributed as follows. (Note the capital includes the insulating machinery but the cost and higher value have been neglected, only depreciation included).

Out put per day 2/3 tons value 77 Rs.(vide details above) and hence the cost of one ton is Rs.115/-.

Even so there is a profit of 7% but with increased

22

output the profit will be considerably more. In any case, the Nakki wire could be rolled from the scrap of the Electrical Department which will show a greater profit.

Apart from all this, as Sir Harold Colam put it, the fact that the Mysore Government possess the necessary machinery will make manufacturers quote a more reasonable rate and will result in indirect benefit.

In view of all this, I want that the scheme should be further examined by the Government Electric Factory, all figures verified and checked again and a complete note prepared and placed before the permanent Chairman, Mr.M.A. Srinivasan. If I may, I would suggest that the scheme may be placed before an early meeting of the Advisory Committee at which Sir Harold Colam may be requested to be present. Mr.Srinivasan may also grant an interview to Mr.Richard and discuss the question with him in detail especially the directions in which his services may be used in this connection.

HIS HIGHNESS THE MAHARAJA OF MYSORE.

Read -

Note No.255 dated 26th September 1939 from the Government Director of Industrial Concerns submitting proposals for the drawing of copper wire, as part of the activities of the Government Electric Factory with a view to encourage the Nakki industry, etc.,

gk 269-39-2

ORDER NO. D2311-12/ gk 269-39-2

Dated, Bangalore, 4th ~~October~~ NOV er 1939.

The Government Director of Industrial Concerns has submitted a scheme for the drawing of copper wire required for transformer winding and for the Nakki industry. As the equipment required for drawing wire for transformer winding involves a heavy outlay, he recommends that for the present, the scheme may be limited to the drawing of wire for the Nakki industry which is in urgent need of some assistance. The Government Director proposes, in consultation with Mr. Henry Richard, Engineer, Bangalore, and the Secretary to Government, Electrical Department, to manufacture locally a small and inexpensive plant for the purpose in the Government Electric Factory. The minimum equipment required for the drawing of bare wire - 90 tons during a year of 300 days - is estimated to cost roughly Rs.4,750/- inclusive of 2 motors which could either be bought or made available from the Factory or elsewhere.

The Government Director proposes the employment of Mr.Richard in the Government

Electric Factory for the purpose of manufacturing, erecting and running the machinery on a salary of s.350/- p.m. during the period of construction and erection of the machinery (about 8 weeks), and Rs.450 p.m. during the period of production. He also proposes to purchase about 100 tons of copper or copper wire required in this connection at about Rs.1200/- a ton from Bombay. It is understood that the scheme promises to be profitable and would save the local Pakki industry from serious dislocation. The proposals of the Government Director are sanctioned. He is requested to report with details the exact amount required during the current year for the working of the scheme so that an additional grant may be sanctioned for the purpose. The Comptroller is requested in the meanwhile to place necessary funds at the disposal of the Government Director for the purchase of copper wire and for other urgent requirements.
